

# DRAGON OR TIGER

FIRE CLAW

## GAMING GUIDE

The game of Dragon Tiger attracts mostly Asian players in land based casinos, but when playing online, any player can enjoy the fast action of the game and can also enjoy a live dealer presentation in real time. Dragon Tiger is played with a standard deck of cards and the game usually used between 6 and 8 decks in a shoe. With this game, players will not play against the dealer. It is similar to Baccarat and players will choose which hand will be likely to receive the highest card. Some players will compare this to Casino War, since a single card is dealt to the Dragon as well as to the Tiger and no additional cards are drawn.
