

GAMING GUIDE

Roulette is one of the oldest and most famous casino games. The object of the game is to correctly guess which segment the ball will drop in.

HERE'S HOW TO PLAY

Bets are placed using colour chips. Each table has a selection of different colour/wheel chips. Each player is given a different colour to identify one player's bet from another. These colour chips can only be played at the table from which they are issued.

The game commences when the dealer spins the ball. The players should at this time place their bets, although they may also place their bets prior to the dealer spinning. As the ball slows down, the dealer shall announce 'No More Bets'. Once this announcement has been made no further bets will be accepted. The segment in which the ball falls will be the winning number and will be announced by the dealer, marked with a "Dolly" and all bets shall be paid or removed accordingly. Should 0 (Zero) be the winning number, any bets placed on the outside chances will lose. Once you finish playing at the table, your colour chips should be given to the dealer to exchange for cash chips. You may use the cash chips on other games or cash them in at the Cashier counter.

IMPORTANT RULES TO REMEMBER

The house reserves the right to declare an invalid spin in the following situations:

1. If the ball is spun in the same direction as the Wheel
2. If the ball does not complete at least 4 revolutions
3. If any foreign object enters the wheel
4. If the ball is propelled or falls out of the wheel
5. If any person interferes with the ball or rotation of the wheel

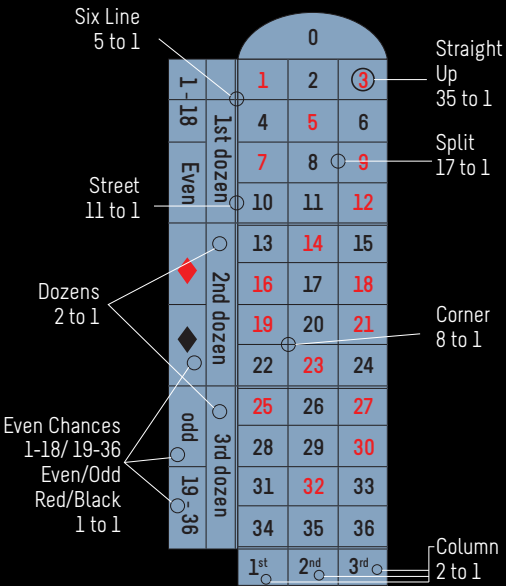

DEL TIN CASINOS

Once the spin has been declared invalid, it shall remain so, regardless of whether or not the ball has settled in one of the compartments before the dealer's attempt to remove the ball from the wheel.

SECTION & NEIGHBOUR BETS

These are more betting options for you wherein you could choose to bet on certain area of the wheel. Ask our staff at the tables to know more about this.

All columns, dozens and even chances bets loses when zero wins.
